ICTS, BENGALURU, INDIA
November 21-December 10, 2016

www.icts.res.in/program/fpqp2016

Application Deadline:
June 30, 2016

GOAL: To introduce young researchers to exciting recent developments in our understanding of quantum physics, both in theoretical and experimental fronts. First two weeks will be a school, and the third week will be a discussion meeting on advanced topics.

Organizers: Angelo Bassi, Sougato Bose, Saikat Ghosh, Tejinder Singh, Urbasi Sinha, Hendrik Ulbricht

Quantum Theory has passed all experimental tests, with impressive accuracy. It applies to light and matter from the smallest scales so far explored, up to the interpretation of quantum mechanics: How do "fundamental physical constants" vary over time? It is now the time to discuss the new frontiers of the fundamental problems of quantum physics. With this in mind, we initiated a program focusing on the theories. In the same year quantum physics was born and three decades later it, and the biggest unsolved problem in fundamental physics is how.
